Summary

Computer Science undergraduate with a strong foundation in programming, data structures, algorithms, and operating systems. Hands-on experience with Linux environments, cybersecurity fundamentals, and system-level analysis. Proficient in C, C++, Java, and Python with a focus on problem-solving, secure software development, and core computer science principles.

Education

Bachelor of Technology in Computer Science and Engineering

Quantum Global Campus

2024 – 2028

Senior Secondary (PCMC)

D.C. Lewis Memorial School

2021 – 2022

Technical Skills

Programming Languages: C, C++, Java, Python

Computer Science Fundamentals: Data Structures, Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks (basic)

Operating Systems: Linux (Kali Linux, Ubuntu), Windows

Cybersecurity: Ethical Hacking Basics, Linux Security, File Permissions, System Hardening Concepts

Web Technologies: HTML, CSS

Databases: SQL

Tools & Platforms: Git, VirtualBox, Linux Command Line

Projects & Practical Experience

Cybersecurity Job Simulations — Deloitte, Tata Group

- Performed simulated security assessments involving threat modeling, vulnerability identification, and basic risk analysis.
- Analyzed security incidents and system scenarios to understand attack surfaces and mitigation techniques.

Linux System and Security Practice

- Worked with Linux file systems, permissions, processes, and user management using command-line utilities.
- Practiced access control, privilege management, and basic system hardening in Kali Linux environments.

Academic Programming Projects

- Developed multiple programs in C and C++ focusing on control structures, memory management, and algorithmic problem-solving.
- Implemented Java applications using object-oriented concepts such as classes, inheritance, and encapsulation.
- Built static web pages using HTML and CSS to understand frontend structure and layout.

Certifications

- Introduction to Cybersecurity
- Deloitte Australia – Cyber Job Simulation
- Tata Group – Cybersecurity Analyst Job Simulation
- Cybersecurity Nexus (CSX / CSXP)

Additional Strengths

- Strong analytical thinking and debugging skills
- Comfortable working in Linux-based development environments
- Consistent self-learner with focus on cybersecurity and software engineering fundamentals
